

# Grants Management and Fiscal Administration Services

## The Need

When states receive federal grant funds, they need an experienced team to manage and administer the funds to their communities. As states then need to monitor grant plan progress and compliance, they need a trusted partner.

In recent years, an unprecedented amount of federal funding has been granted to U.S. states to address nationwide emergencies. Billions of dollars of funds were distributed through the Coronavirus Aid, Relief, and Economic Security (CARES) Act and the American Rescue Plan Act (ARPA). Once all federal funds were allocated and critical needs continued to rise, states relied on their own financial resources to address the urgent needs of the people they serve. As a result, states needed large-scale project management support.

Navigating capacity, resource, and staffing shortages while supporting communities during a global crisis was a significant challenge.

## The Opportunity

From 2020 through 2023, with a significant increase in emergency federal fund distribution to state and local governments, states needed to optimize all funding opportunities while delivering vital services as quickly as possible. It was essential for them to:

- Design grant programs and agency applications
- Deploy applications and evaluate grant submissions
- Administer and manage payments
- Evaluate and report on grant program outcomes

## The Strategy

With more than three decades of experience providing federal revenue management services, PCG can help health and human services agencies manage federal and state grant programs and administer grant opportunities to achieve agency goals.

We have worked with states across the U.S. to perform various services, including:

- Grant program design and development
- Fiscal intermediary and payment distribution
- Technical assistance and communication
- Compliance monitoring and auditing

As a full-service grant management partner, we establish grant operations quickly and efficiently to provide agencies and funders with a consolidated online platform—with all the necessary tools for grant lifecycle management.

Our tailored approach to the specific needs of each client directly supports the achievement of their grant funding goals.

## Outcomes

PCG's grant management team has **administered more than \$1.8 billion in grant funds** through both federal and state sources to help health and human services agencies continue critical operations and support their communities.

*Partnering with PCG will enable your agency to leverage our team's broad experience, deep program knowledge, and proven grant management approaches.*

**Optimize your federal funding opportunities—now and in the future—whenever essential funds are distributed.**

# PCG. Let's solve it together.
